Somnath Das

Senior Engineer at Ericsson | AWS Certified Solutions Arch | Python Developer | CEH v13 | AI & Cybersecurity Certified | Technical Architect | R&D & DevOps Automation | Linux · Docker · Kubernetes | Ex-CGI & Capgemini

Bengaluru, Karnataka, India

Summary

I'm a passionate and results-driven Software Engineer with experience building automation frameworks, managing cloud infrastructure, and improving operational efficiency across large-scale systems. I'm experienced in building end-to-end automation across cloud, infrastructure, delivery, and security using IaC, monitoring, compliance, and intelligent workflows to improve reliability, reduce manual effort, and ensure scalable, secure operations.

My technical skill set spans AWS, Python, Linux, Docker, Kubernetes, and databases (SQL, NoSQL, PostgreSQL, Snowflake etc). I am also CEH v13 certified and have hands-on exposure in cybersecurity practices, including automated compliance checks, threat analysis workflows, and integrating security controls into pipelines.

I've successfully delivered AI/ML-driven proof-of-concepts that enhance automation, optimise system behaviour, and strengthen security analytics. I enjoy collaborating with developers, security teams, and product owners to design scalable, secure, and business-aligned solutions.

I'm currently deepening my expertise in cloud architecture, AI integration, and cybersecurity. I'm committed to continuous learning and enjoy contributing to innovative projects in cloud, automation, AI, and security engineering.

I thrive in dynamic environments that foster innovation, teamwork, and knowledge sharing. I welcome opportunities to connect with professionals who share a passion for cloud computing, automation,

AI, and security and to contribute meaningfully to transformative projects.

Experience

Ericsson

Senior Engineer

December 2024 - Present (1 year 8 months)

Bengaluru

CGI

3 years 1 month

Senior Software Engineer

January 2024 - December 2024 (1 year)

Bengaluru, Karnataka, India

Software Engineer

December 2021 - December 2023 (2 years 1 month)

Bengaluru, Karnataka, India

Capgemini

2 years 7 months

Associate Consultant

July 2021 - December 2021 (6 months)

Hyderabad, Telangana, India

Senior Software Engineer

June 2020 - June 2021 (1 year 1 month)

Hyderabad, Telangana, India

Software Engineer

June 2019 - June 2020 (1 year 1 month)

Hyderabad, Telangana

Education

Ghandhi institute for technological advancement

Bachelor of Technology - BTech, Mechanical Engineering · (2014 - 2018)
